

FANUC ROBOT (R-30iB/R-30iB Mate) MODBUS SAMPLE PROJECT

- Simplified address mapping on the panel!
- Creating screens for position adjustment only by setting!

Problem (Before) - Robot system designers
- Production/Maintenance engineers

Robot data adjustment screens: Needs designing man-hours.
Position adjustment after delivery: Needs a teaching pendant.

- Complicated mapping is required for reading detailed information.
- Screens need to be re-designed even in design reuse and modification, which leads to high cost!

Pro-face can solve the problem!

Solution (After) - General-purpose monitoring screen!
- Robot setting list! No screen processing!

- Transfer of general-purpose screen. Operation screen is completed!
- Easy robot setting according to the mapping list!

Please make an inquiry to our sales staff for details on this product.

Notes: For support and warranty of products from 3rd party, please contact the manufacturer / distributor of the product.
