- BLUE, BLUE Open Studio, or GP-Pro EX License
- 4 Days of virtual training
- 4 Hours of personalized support
- 2 Hours of follow-up support

* Some restrictions apply

SP5000 Series

More than just an HMI, the SP5000 Series allows a huge variety of data to be downloaded to Smart Portal and transmitted in an optimal format to those who need it.

ST6000 Series

Optimize operations and machine information with a new level of visualization in HMIs. Five wide screen sizes available; programmable with BLUE or GP-Pro EX software.

LT4000M Series

LT4000M HMI is a flexible operator interface plus control that combines an HMI with a PLC to save panel space, wiring work, and programming time. 22mm modular mounting and separation cables offer location options never before possible.

STM6000 Series

Modular design with superior visualization, combined with flexible and high performing software and a 22mm installation solution, provides extensive connectivity and application options.

* Must have less than \$1,000 in annual sales with Pro-face America in the last 24 months.
Must present a minimum of \$10,000 in annual opportunities with Pro-face America.
